Mr Frank Tierney (junior) followed in his father's and grandfather's footsteps, starting his career as a valuer before moving into the family business as a salesman and auctioneer.

Frank paved his own way, developing his knowledge and experience which he fine-tuned through numerous decades of changing times.

Throughout Frank's career he has overseen in excess of 7,000 real estate transactions and 1,000 auctions.

With Frank's leadership and passion for property and the Sunraysia region, a new generation has embarked on this new journey with him, where they will take old school values into the future.

Over the years many people have had the opportunity to be mentored by Frank.

Those who experienced the 'Tierney teaching' would say that he had given them an invaluable understanding of property and service, taught in a way that no text book ever could.

Partnering with Frank is Justin Grogan, a long standing real estate agent of 20 years and Renee Ormesher, specialist in property development and project marketing.

"Renee and I are excited to be embarking on this new endeavour with Frank and feel proud to continue the Tierney legacy of professional old fashioned service," Director/Sales Justin Grogan said.

"Justin and I have worked alongside Frank for many years and are both passionate about property and the local area."

"We are committed to assisting people achieve their property goals, whether, it be the sale or purchase of a family home or building a property investment portfolio."
